Vandalur, Chennai | +91-7338900352 | jobmails2202@gmail.com | linkedin.com/in/praveen-kumar-g

PROFESSIONAL SUMMARY

Detail-oriented Mechanical Design Engineer specializing in R&D, product development, and production support. Proficient in SolidWorks, Siemens NX, and AutoCAD for precise 2D drafting, 3D modeling, and fixture design. Skilled in comprehensive Bill of Materials (BOM) management and process design, with a proven track record of optimizing manufacturing efficiency and reducing material wastage by 2%.

CORE TECHNICAL SKILLS

Design & Modeling Tools: SolidWorks, Siemens NX, AutoCAD, Creo, CATIA.

Engineering Expertise: 2D Drafting & 3D Modeling, Assembly Design, Component Packaging, Fixture Development.

Manufacturing & Operations: Process Design, R&D Support, Bill of Materials (BOM) Management, Tooling & Production Support.

Analysis & Quality: ANSYS Simulation, 5S Auditing, Six Sigma Green Belt Project Assistance.

PROFESSIONAL EXPERIENCE

Design Engineer | R&D, Ashok Leyland

September 2025 – Present

- Design & Drafting:** Developed high-precision 2D engineering drawings for spares and structural 3D assembly models using SolidWorks and Siemens NX, ensuring 100% alignment with senior engineering specifications.
- Process Optimization:** Collaborated on process designs that resulted in a 2% reduction in material wastage, directly impacting factory-floor cost-efficiency.
- Fixture Development:** Designed specialized manufacturing fixtures for fettling and grinding operations, successfully lowering component setup times and improving production consistency.
- BOM & Documentation:** Managed comprehensive Bill of Materials (BOM) data and structured accurate spare parts quotation lists to streamline procurement cycles.
- Workspace Quality:** Conducted internal audits for 5S implementation in the design room to assist in maintaining workflow efficiency and standardizing documentation organization.

Associate | Sutherland Global Services

March 2021 – July 2025

- Process Improvement:** Served as a Subject Matter Expert (SME) focusing on non-voice process improvements, optimizing performance metrics.
- Conflict Resolution:** Managed high-volume customer inquiries and resolved complex client operational issues, achieving a consistent 90% satisfaction rate.
- Cross-Functional Communication:** Maintained professional communication loops used to clarify operational data and explain complex technical/process details to diverse stakeholders.

EDUCATIONAL BACKGROUND

Bachelor of Engineering (Mechanical Engineering)

June 2016 – May 2020

Dhanalakshmi College of Engineering

CERTIFICATIONS & IT SKILLS

Technical Certifications: Certified in AutoCAD, CREO, CATIA, and ANSYS.

Software Expertise: Microsoft Office Suite (Expert-level Excel for data tracking and BOM management).
